

How to Fix “Save SecArea...error” on BB5 NoTp Tool 0.0.0.112

If you encounter the problem “Save SecArea...error” while trying to unlock a BB-5 phone with the BB5notp.exe application on Genie-Universal, you can fix this by deleting the phone Backup-Files from the SD-Card .

(A backup-file is created on every Unlock process and those need to be deleted after approximately 200 unlocks)

How to delete the Backup-Files:

- Connect Genie-Universal in USB-Mode with the Mini-USB cable to the PC

1. Press “MODE”
2. Select “USB-DISK”
3. USB-Disk Mode enabled

Your PC will detected a Mass Storage Device .

Now, navigate to folder “GENIE:\Files\Nokia\BB5\PM” and delete all “.bin” files inside this folder.
(you can delete whole content from that folder)

That’s it, bb5notp.exe is now ready to work...
